

I benefit greatly from listening to XM Radio and pay to do so. I think it would be detrimental to allow for the continued monopolization of the airwaves by a select few large conglomerates who control what I listen to. XM Radio should be allowed the same, if not more, benefits, due to the premium that the satisfied XM Radio customers continue to pay. If we are forced by the FCC to only listen to the mindless corporate influenced drivel, then our rights as paying consumers would be greatly reduced. Do not allow Clear Channel's (and others, of course) lobbyists take our rights away. Thank you.
